

Description of the position: Structural/Bridge Engineer (*cat I*) (54 Working days)

Contract: Mid-term

Location: Sierra Leone

Project title: Technical Audit Services for the Bandajuma – Liberian border road and bridges project

Overall Objective: The Global objective of this assignment is to support the Contracting Authority (NAO) of the project to effectively discharge its supervisory functions and to provide the necessary reassurance regarding the implementation of the audited works contracts and supervision contract in conformity with best international practice.

Expert profile CAT I

Education: Must possess a relevant Master Degree in Civil/Structural Engineering or equivalent professional experience of at least 20 years. Excellent report writing, communication and computer skills are essential.

General professional experience: Minimum of 15 years of post-qualification experience in civil engineering structural design.

Specific professional experience: Must have at least 10 years of practical experience in bridge design and construction including multi-span bridges with piled and strip foundations. Must have experience of road drainage structures such as box culverts. Must also have a good understanding of concrete quality control procedures as well as experience in the design and construction of steel structures for example plate girders/steel beams etc. Competence with the use of latest computer aided Design applications for structural design is highly desirable.

Language skills: excellent knowledge of English.

Location & Duration:

The assignment will take place in Sierra Leone, with a field inspection visit per mission to the sites of the project under implementation. The technical audit assignment is expected to commence on the **25th of September 2017**.

Apply:

Note: The starting date and end date (month/year) of experience must be clearly specified in the CV. Civil servants and other staff of the public administration of the beneficiary country cannot be recruited as experts.
